KRATKI ARKE 80 TUNNEL

The Kratki Arke range has earned a reputation as the best-value insert fireplaces in South Africa over the past decade. With thousands of satisfied clients in SA, it's admired for its robust construction, refined design, and outstanding performance. The Arke is now offered as a double-sided fireplace - the Kratki Arke 80 Tunnel - allowing the warmth and beauty of the fire to be enjoyed from two rooms or spaces.

Kratki's wood burning fireplaces combine sleek, contemporary design with advanced combustion technology to deliver exceptional heating performance. Engineered for efficiency and ease of installation, these Arke built-in fireplaces require minimal building work and offer a refined, modern aesthetic.

Designed to endure Poland's harsh winters, each Kratki Arke 80 Tunnel fireplace is constructed from thick, high-quality steel – evident in the solid weight and robust build of every unit.

The closed combustion fireplace comes standard with convection box and finishing frames.

ADDITIONAL INFORMATION

Weight	136 kg
Dimensions	85 × 45.2 × 61.4 cm
CO emissions	0.10%
Colour	Black
Country of manufacture	Poland
Efficiency	75%
Flue pipe diameter	200mm
Fuel	Wood
Heat output	16 kW
Heating capacity	190 – 400m3
Material	Steel
Warranty	10-year warranty
Ash pan	Yes
Combustion technology	Primary and secondary combustion
Door	Standard doors
Fan system	No
Flue exit	Top
Label	New

PRODUCT DESCRIPTION

Inside the fireplace chamber, **Kratki's signature ceramic lining** enhances both combustion efficiency and long-term durability. These heat-intensifying ceramics deliver exceptional thermal performance, supporting primary and secondary combustion for a cleaner burn and maximum heat output. By maintaining consistently high temperatures within the combustion chamber, the ceramics make the fireplace easier to operate, improve heat delivery, and significantly reduce soot buildup in the flue system. Lining the chamber with ceramics provides the highest level of protection to the steel structure, extending the lifespan of the fireplace.

The **body of the fireplace** insert is built from high-quality, thick steel, ensuring exceptional resistance to high temperatures. Each unit is precision-welded in a shielded noble gas environment for superior structural integrity and airtight performance. Using advanced laser-cutting and CNC bending technology, every steel component is crafted with accuracy and consistency to guarantee a perfect fit and long-lasting durability.

A large, black-edged glass door frames the flames beautifully, while **Kratki's superior heat-resistant glass** and air-wash system help keep the viewing window clear. For improved safety and performance, as well as to increase their lifespan, the heat-resistant glass that Kratki uses is of the highest quality.

Kratki's signature fireplace grate design is engineered using thick cast iron, featuring re-enforced ribbing and multiple bends to maximise strength, durability, and long-term performance.
A robust steel slide-out ash box ensures easy cleaning and everyday convenience.

The **Arke frame system** features a sturdy, thick steel finishing frame designed to deflect heat and protect surrounding walls from heat damage. A discreet slot on the underside of the bottom frame allows necessary airflow to reach the fireplace.

The **comfortable handle** features a solid, ergonomic design with a modern aesthetic. Its perforated construction not only enhances the contemporary look but also helps to dissipate heat.

Built to deliver lasting warmth and reliability, all Kratki wood-burning fireplaces are backed by a **5-year warranty**, reflecting Kratki's commitment to quality, performance, and longevity.
