

KRATKI PATIO LIGHT GRANITO

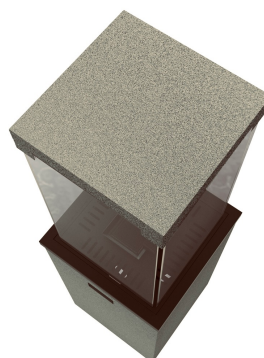

Kratki Patio Light Granito fireplaces bring instant warmth and modern style to any space. Designed with a sleek, contemporary look and built to Kratki's high European standards, these gas fireplaces offer a powerful 8.2 kW heat output with the convenience of "switch-on" comfort. Hidden wheels make them easy to move, while the concealed gas bottle keeps the design clean and elegant. Perfect for restaurants, events, and residential homes – these mobile fireplaces add atmosphere, practicality, and a touch of luxury wherever they're used.

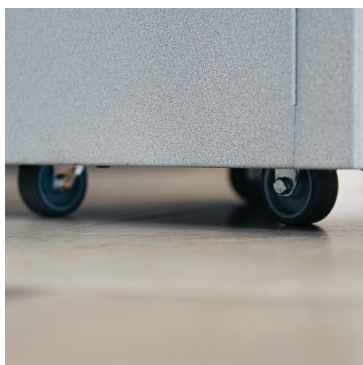

Kratki Patio Light Granito uses the renowned Maxitrol gas control system (made in Germany) - one of the most trusted names in gas technology – ensuring safe, reliable operation. The unit is LPGSA certified.

Combustion technology	Ventless gas
Label	New

PRODUCT DESCRIPTION

The Granito design features a refined **grey-and-beige speckled finish** that adds a modern, textured aesthetic to your space.

The Kratki Patio Light Granito is an **open gas fireplace that does not require flue pipe installation**.

Hidden wheels enhance the clean, modern aesthetic while giving the unit a “floating” appearance and allowing easy movement across flat surfaces. The wheels are lockable if you wish to stabilise the unit.

A modern ceramic burner that has a square shape is used for an **impressive central flame**. The four glass panels provide safety and also protect the flame from wind. The glass panels reflect the image of the fire to improve the visual flame effect further. Additionally, decorative elements (not included) such as stones or decorative glass can be used in the fireplace to enhance the look of the heater.

Besides **residential use**, the Kratki Patio Light is also a popular choice for **restaurants, hotels and event companies** where the fireplace is positioned at entrances, dining and leisure areas.

The surround of the fireplace consists of powder coated steel making it **more resistant to scratches and rusting**.

The Kratki Patio Light Granito has a manual control to turn the fireplace on or off and adjust the flame height.
The Maxitrol (Germany) **advanced and safe gas control system** is used.
